RESPONSE

Sir:

This is responsive to the Office Action, dated 10/22/2003, for the above-identified patent application. An amended set of claims is attached hereto.

REMARKS

1. Applicant thanks the Examiner for his assistance and courtesy during a interview held on 1/5/2004. During the interview, the Examiner indicated that claims drawn to such features of the invention as multidimensional power flows, the specifics of power flow at particular times, and the real time nature of the invention would appear to overcome the present rejection, which is discussed below. Applicant appreciates that any actual allowance of the claimed subject matter is subject to the Examiner's review of the actual claims presented
